

What challenges or concerns do you have this school year related to students walking, biking, and rolling to and from school?

In order to help the City of Minneapolis and Minneapolis Public Schools Safe Routes to School (SRTS) understand current barriers and opportunities to help make walking, biking, and rolling safe, convenient, and comfortable, please take **this short survey and add comments to the interactive map**. The map is the prominent tool used to help the City identify SRTS project opportunities.

Use the QR code or find the survey link at
